In commenting on the Company's results, Bowen Diehl, President and Chief Executive Officer, stated, "The unprecedented effects of the COVID-19

pandemic and associated shelter-in-place directives began during the March quarter and continued into the June quarter, creating instability and uncertainty in the market and largely halting the US economy. That said, we are encouraged by the signs that the economy is opening back up. We are pleased to report that our team is healthy and has been working remotely since mid-March with almost no disruption to our operations. Some key decisions we made over the past two years have prepared us well for the current environment. First, we reduced equity exposure in our portfolio through the sale of Media Recovery. Second, we have been consistent since the launch of our credit strategy in our focus on first lien senior secured debt and today have a credit portfolio that is 90% first lien senior secured. We have conservatively managed our capital structure by being diligent to raise unsecured debt and sell equity through our ATM program in lockstep with being able to put the capital to work and today have 50% of our debt capital sourced from the unsecured bond markets with the earliest maturity in December 2022. In addition, during the quarter, we enhanced our liquidity profile by increasing our bank borrowing capacity by \$30 million, growing total commitments to \$325 million. Finally, over the past two years we have negotiated for higher LIBOR floors on our loans such that today we have a robust weighted average LIBOR floor across our loan portfolio of 1.4%. While we have several credits in the portfolio that have experienced declining performance this quarter, as evidenced by the 9.6% decrease in our net asset value per share, we believe that the majority of the unrealized depreciation is a result of mark to market volatility and temporary operational issues associated with the aftermath of COVID-19. We believe our flexible capital structure and significant liquidity position allows us to fully support our existing portfolio companies, where needed, while continuing to seek new investment opportunities on a highly selective basis. As a further demonstration of our confidence and shareholder alignment, our directors and officers purchased approximately 107,000 shares of CSWC stock during the quarter, bringing the group's total ownership in Capital Southwest to approximately 10% of the outstanding common stock. In addition, we are pleased that the board declared \$0.51 per share in total dividends for the September 2020 quarter as a further demonstration of our confidence in the earnings power of our asset base and the flexibility of our capital structure. In summary, we believe that our conservative underwriting and proactive strategic planning prior to the pandemic have prepared us to weather the impacts from COVID-19 and thrive in the long term."

#### **Fourth Quarter Fiscal Year 2020 Operating Results**

For the quarter ended March 31, 2020, Capital Southwest reported total investment income of \$15.0 million, compared to \$16.0 million in the prior quarter. The decrease in total investment income was attributable to the one-time transaction fee and final dividend received in connection with the sale of Media Recovery, Inc. in the prior quarter and a decrease in the weighted average yield on debt investments due to lower LIBOR, partially offset by an increase in average debt investments outstanding.

For the quarter ended March 31, 2020, total operating expenses (excluding interest expense) were \$3.5 million as compared to \$4.0 million in the prior quarter. The decrease was primarily related to a decrease in the cash compensation accrual in the current quarter.

For the quarter ended March 31, 2020, interest expense was \$4.2 million as compared to the \$4.1 million in the prior quarter. The increase was due to an increase in the average outstanding debt on the credit facility partially offset by a decrease in the weighted average interest rate due to lower LIBOR.

For the quarter ended March 31, 2020, total pre-tax net investment income was \$7.4 million, compared to \$7.9 million in the prior quarter.

For the quarter ended March 31, 2020, there was tax expense of \$0.4 million, compared to \$0.8 million in the prior quarter. The decrease was due to a larger than normal excise tax accrual in the prior quarter, driven by the undistributed taxable income balance at the 2019 tax year end.

During the quarter ended March 31, 2020, Capital Southwest recorded total net realized and unrealized losses on investments of \$31.9 million, compared to total net realized and unrealized losses on investments of \$13.9 million in the prior quarter. For the quarter ended March 31, 2020, this included total net realized losses on investments of \$0.1 million and net unrealized depreciation on investments of \$31.8 million. The net decrease in net assets resulting from operations was \$25.0 million for the quarter, compared to \$6.8 million in the prior quarter.

The Company's NAV per share at March 31, 2020 was \$15.13, as compared to \$16.74 at December 31, 2019. The decrease in NAV per share from the prior quarter is primarily due to net unrealized depreciation on the investment portfolio.

#### **Fiscal Year 2020 Operating Results**

For the year ended March 31, 2020, Capital Southwest reported total investment income of \$62.0 million, compared to \$51.9 million in the prior year. The increase in investment income was attributable primarily to an increase in average debt investments outstanding offset by a decrease in the weighted average yield on debt investments.

For the year ended March 31, 2020, total operating expenses (excluding interest expense) were \$15.9 million, compared to \$14.9 million in the prior year. The increase in operating expenses was primarily due to the write off of deferred offering costs of approximately \$0.5 million as well as an increase in audit and legal fees related to maintaining the Equity ATM Program (as described below).

For the year ended March 31, 2020, there was interest expense of \$15.8 million, compared to \$12.2 million in the prior year. The increase in interest

expense during the year was due to increased average debt outstanding on our senior secured credit facility (the "Credit Facility"), as well as the addition of the 5.375% Notes due 2024 (the "October 2024 Notes") outstanding.

For the year ended March 31, 2020, total pre-tax net investment income was \$30.3 million, compared to \$24.8 million in the prior year.

For the year ended March 31, 2020, there was tax expense of \$2.1 million recorded, compared to \$1.0 million in the prior year. The increase in tax expense versus the prior year was due primarily to an increase in excise tax, an increase in taxable income due to the use of the net operating loss in the prior tax year, and a gain on the exit of an investment held in the Company's taxable subsidiary.

During the year ended March 31, 2020, Capital Southwest recorded total net realized gains on investments of \$42.2 million and net unrealized depreciation on investments of \$92.8 million, of which \$49.2 million was the reversal of net unrealized appreciation recognized in prior periods due to realized gains noted above. The net decrease in net assets resulting from operations was \$22.4 million for the year, compared to the net increase in net assets resulting from operations of \$33.1 million in the prior year.

The Company's NAV per share at March 31, 2020 was \$15.13, as compared to \$18.62 at March 31, 2019. The decrease in NAV per share from the prior year was primarily due to \$0.40 per share in supplemental dividends and \$0.75 per share in a special dividend paid during the year, taxes incurred in connection with the deemed distribution of our retained capital gains, and net unrealized depreciation on investments.

Net proceeds were \$26.2 million after commissions to the sales agents on shares sold. Cumulative to date, the Company has sold 1,495,088 shares of its common stock under the Equity ATM Program at a weighted-average price of \$21.67, raising \$32.4 million of gross proceeds. Net proceeds were \$31.7 million after commissions to the sales agents on shares sold.

Additionally, I-45 SLF has total commitments outstanding of \$165 million from a group of four bank lenders in its Deutsche Bank led credit facility, which is scheduled to mature in July 2022. As of March 31, 2020, I-45 SLF had \$125 million in borrowings outstanding under its credit facility. Subsequent to the quarter ended March 31, 2020, I-45 reduced its credit facility commitments to \$150 million through an optional prepayment.

All of the share buyback activity for the fiscal year occurred during the quarter ended March 31, 2020.
